

Change The Point Of Attack

GameFocus/ObjectivesTransition/ResetProgression

Description

2 teams both with a ball. The object is for one of the wingers to get to the back line without being tackled. For a tackler to be released by the other team, the tackler has to receive and leave the ball in the coned area.

When one of the wingers is threatened the team should try and change the point of attack by passing the ball via every player to the other side. To release the other tackler, the ball has to be passed via sweeper.
